PROFESSIONAL SUMMARY

Data Engineer with ∼3 years of experience designing end-to-end data products, ETL/ELT pipelines, and the governed data layer that serves enterprise reporting and AI use cases. Proven ability to translate business requirements into data models and KPIs, automate workflows with Python and SQL, and integrate source systems through Fabric Link, Microsoft Graph API, and REST APIs. Hands-on experience with large-scale data modeling (Medallion/Star/Snowflake) and query performance optimization, including a refactor that cut Fabric capacity utilization from 90% to 30%. Adept at working cross-functionally with business stakeholders to align data strategy with commercial objectives, including revenue analytics, cost visibility, and customer lifecycle and usage behavior analysis. Currently engaged full-time as augmented staff with a data engineering focus at a UK-listed global energy services company (11 countries, 25+ operating sites).

PROFESSIONAL EXPERIENCE

Associate Analytics Engineer, Data Engineering & Security *Jan 2025 – Present*
Data Crafters LLC (Microsoft Solution Partner) *Dhaka, Bangladesh*

- **Cut Fabric capacity utilization from 90% to 30% (F64)** by refactoring 123 overlapping SQL views into 66 clean star-schema objects (37 facts, 29 conformed dimensions), improving query performance and downstream consistency across every consuming layer.
- **Established a single source of metric truth** by consolidating 14 overlapping Import-mode semantic models into 8 unified DirectLake models (one per business area) and 57 reports into 39 across 12 apps, aligning metric definitions and KPIs across all reporting layers, improving governance and refresh performance, with measurable increase in report adoption.
- **Own the unified data layer end to end** for a UK-listed global energy services company (11 countries, 25+ operating sites), designing Bronze/Silver/Gold Medallion Architecture on Microsoft Fabric with dbt and Spark notebooks, integrating D365 F&O, D365 CRM, SharePoint, and on-prem sources into a single governed model, with additional support for clients in aerospace, industrial coatings, A/E, and water engineering.
- **Enabled automated, auditable release across Dev/Test/Prod** by designing and operationalizing Azure DevOps CI/CD pipelines for Fabric and Power BI assets, with peer-reviewed pull requests and rollbacks.
- **Eliminated manual on-call effort** with event-based Logic Apps monitoring that routes capacity, refresh, and cost anomaly alerts to Teams and email as they occur.
- **Made governed data consumable by AI** by providing infrastructure and CI/CD integration for Fabric Data Agent and Copilot Studio, laying the foundation for predictive analytics and AI agents on the refactored star-schema layer.
- **Translated complex business requirements** from global enterprise clients into dimensional data models, KPIs, and executive Power BI dashboards.
- **Partnered directly with US and European stakeholders** on requirements gathering, solution design, technical onboarding, and ongoing support across time zones.

Junior Data Analyst *Apr 2024 – Dec 2024*
Data Crafters LLC *Dhaka, Bangladesh*

- **Gave business teams unified revenue and cost monitoring across cloud providers** by delivering end-to-end Cost Visibility data products for 6 US clients across oil & gas, aerospace, A/E, industrial coatings, and water engineering, ingesting, transforming, and visualizing multi-cloud spend data in Power BI.
- **Migrated Dynamics 365 Synapse Link to Fabric Link**, remapping 140+ Azure SQL queries to Fabric T-SQL for Fabric SQL Analytics Endpoints, performing row-level validation, resolving compatibility issues, and validating data integrity (later scaled to full enterprise rollout).
- **Reduced recurring manual work** with Python and Logic Apps automations across client engagements, covering scheduled refreshes, capacity scaling, license cleanup, and automated report distribution.
- **Enabled data-driven resource optimization** through in-house monitoring dashboards built on Fabric Capacity Metrics and FUAM, surfacing capacity hotspots, slow refreshes, and orphaned items.
- **Held performance SLAs at minimum cost** by optimizing Fabric capacity and Azure VM reservations across internal and client environments.
- Participated in R&D on emerging Fabric capabilities (Real-Time Intelligence, Data Activator, Data Agent) and translated findings into reusable client engagement patterns.

Data Analyst Intern *Feb 2024 – Mar 2024*
Data Crafters LLC *Dhaka, Bangladesh*

- **Delivered an actionable Power BI monitoring dashboard for the security team** by building an analytics pipeline that ingested Entra ID sign-in logs via Microsoft Graph API into Fabric using Pipelines and Notebooks, then modeling the data.
- Supported pipeline development and data validation – cross-referenced source systems, documented data models, and contributed to lineage and metadata captures.

TECHNICAL SKILLS

Languages	SQL (T-SQL), Python (PySpark), Spark SQL, PowerShell, DAX
Data Platform & Modeling	Microsoft Fabric (OneLake, Lakehouse, Warehouse, Pipelines, Spark Notebooks), Medallion Architecture, Star/Snowflake Schema, Dimensional Modeling, dbt, ETL/ELT, Data Warehousing, Incremental Refresh, Performance Tuning
Integration & APIs	Microsoft Graph API, Fabric REST API, D365 F&O and CRM via Fabric Link, SharePoint, on-prem sources
Orchestration	Fabric Pipelines, Azure Logic Apps (event-based alerting, scheduled workflows), Python automation
Cloud & DevOps	Azure (SQL, Storage, Key Vault, VMs, Cost Management), Azure DevOps (Repos, Pipelines, CI/CD), Git, GitHub
Analytics & AI	Power BI (Semantic Models, DirectLake, DAX), customer lifecycle and usage behavior analysis, revenue stream modeling, cost and ROI analysis, KPI frameworks, Fabric Data Agent and Copilot Studio infrastructure
Platform Administration	*Microsoft 365 and Azure tenant administration, Entra ID (PIM, RBAC, Conditional Access), service principal and app registration lifecycle, Intune, Defender.*

CERTIFICATIONS

Microsoft Fabric Data Engineer Associate **(DP-700)** ↗ *Microsoft, Apr 2025*
Microsoft Fabric Analytics Engineer Associate **(DP-600)** ↗ *Microsoft, Jun 2024*
Microsoft Azure Security Engineer Associate **(AZ-500)** ↗ *Microsoft, Jul 2024*
Microsoft Applied Skills: Real-Time Intelligence with Microsoft Fabric ↗ *Microsoft, Dec 2024*
SQL – Advanced ↗ *HackerRank, Jan 2024*

EDUCATION

BSc in Computer Science & Engineering *Jul 2019 – Nov 2023*
Ahsanullah University of Science & Technology *Dhaka, Bangladesh*
CGPA: 3.3 / 4.0 · Merit-Based Scholarship Recipient

AWARDS

- **Government Scholarship** – Board of Intermediate & Secondary Education, Dhaka (HSC 2018, SSC 2016, JSC 2014)
- **Merit Based Scholarship** – Ahsanullah University of Science & Technology (2020)
